Hear What Our Customers Are Saying

“It is a no-brainer. The service basically pays for itself in fuel savings alone. The ability to better service our client base by knowing where our fleet is at all times is invaluable”

— John Kennedy, Operations Manager, Art Newsome Inc.

“I would recommend Spireon to everyone so they can improve their fleet as well.”

— PJ Kher, Dispatcher, United Global Logistics

“A great product; helps with locating your drivers, and to increase productivity.”

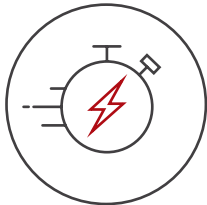

— Terri Jenkins, Operations Manager
Preventive Fire & Safety Equipment, Inc.

Easier, More Efficient Management

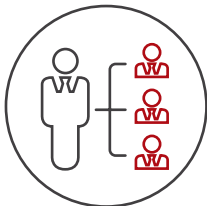

With GPS fleet tracking technology, managers found they could:

Reduce overtime paid by seeing exactly where your drivers are and what they are doing.

Spend less time preparing basic reports and verifying HOS (Hours of Service) logs from drivers.

Focus on other areas of business knowing that with GPS tracking, they could receive detailed fleet reports whenever needed.

Finally relax, knowing that their vehicles and drivers are where they need to be, when they need to be.

Improve CSA scores and reduce money paid in fines with fewer maintenance-related violations.

Save money on insurance and premiums with reduced accidents and speeding violations, and get alerts when your drivers violate your company's safety policies!
